

# Dead Time by Anne Cassidy

In the hunt for the truth behind their parent's disappearance, Rose and Joshua discover that the truth is hidden behind many layers and they're going to have to work hard to discover the reality no one seems to be prepared to tell them.

The Murder Notebooks Series uncovers secret coded notebooks that appear to contain important information, can Rose and Joshua crack the code and uncover the truths?

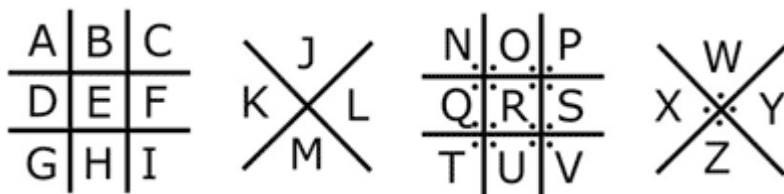

Can you make a hard to crack code? Pick an article from the local or national news and rewrite it in your coded format. You can have PICTOGRAMS (images instead of words/letters) or just replace each word with a different symbol or letter. It's up to you.

Use the Dead Time book to devise a code based on the text as a key. It could be that you code specific words, individual letters, even sentences—however you want to work it.

Once you've completed it, swap it with someone else to check the code works.

Here's an example of a code on it's own:

This is the cipher:

And here's the message:

L E C O V L J O U O > F T L W <

Can you solve the riddle?

Both Rose and Josh have tattoos of Blue Butterfly's on their bodies. It matches the book that Rose's mum left behind.

Can you design a butterfly tattoo for them to wear?
